Summary

Frontend Developer (SDE-2) with **4+ years** of experience building high-performance, scalable web applications using **React**, **Next.js**, and **Redux Toolkit**. Proven ability to **own end-to-end frontend modules**, deliver complex platforms under tight timelines, and drive measurable performance improvements. Strong focus on clean architecture, performance optimization, and intuitive user experiences.

Experience

INDmoney

Feb 2026 – Present

SDE – 2 (Frontend)

Gurugram, India

- **Built the web experience for INDsocial**, a **social platform** where users share trades, live positions, and portfolios—implementing profile and post views with **seamless deep-linking** into the native app for transactional flows.
- **Optimized real-time option-chain streaming** through **virtualization**, cutting rendered tick updates from **~200 to ~50 per cycle (~75% reduction)** and significantly lowering render load on the data-heavy options screen.
- **Designed and shipped custom TradingView indicators (CPR, Auto VWAP, Smart Money Concepts)** by converting **Pine Script to JS**, migrating rendering to **native TradingView primitives** to improve chart performance and reliability for live trading users.
- **Shipped an AI pattern-detection toolbar button** that renders chart patterns on the terminal in **real time**, consuming backend-detected historical pattern data to draw precise, deterministic overlays.
- **Integrated Sentry** for client-side error monitoring and logging, surfacing frontend errors that were previously invisible under the existing **New Relic** setup and significantly improving production debuggability.
- **Championed accessibility across the platform**, helped team members on ally best practices and establishing **WCAG-aligned UI standards** adopted team-wide.
- **Worked on the trade screen** for the **US Stocks** product, enabling users to place and manage US equity orders.

SMC Global

July 2024 – Feb 2026

Member of Technical Staff – 2 (Frontend)

Delhi, India

- **Led frontend ownership** of **smceasyinvest.com**, building core investment flows including **mutual fund cart**, **SIP /lumpsum investments**, **redemptions**, and **scheme switching** using **React**, **Next.js**, and **Redux Toolkit**, enabling a full-scale retail investment platform launched **from scratch within 6 months** by a **3-developer team**.
- **Designed and delivered the NCD bond platform end-to-end in 3 days**, taking complete **UI/UX ownership without design support**, and implemented frontend optimizations (code-splitting, asset optimization, state efficiency) resulting in **~40% faster page loads** across IPO, NCD, and Reports modules.

Algoworks

Jan 2022 – June 2024

Software Engineer

Noida, India

- **Built key frontend modules** for a marketplace platform enabling service listing, rentals, and purchases, implementing **real-time chat (Twilio)**, **authentication (AWS Cognito)**, and **payments (Stripe)** to support end-to-end user transactions.
- **Developed multiple production web applications** including a **voter-candidate management system** with admin dashboards and **Chart.js** visualizations, and a **subscription-based social platform** supporting post creation and user management using **Next.js and React**.

Skills

Languages

JavaScript, TypeScript, Pine Script

Frontend

React, Next.js, Redux, Redux Toolkit, Context API, HTML, CSS, WebSockets

Libraries & Tools

Webpack, Babel, Jest, Enzyme, TradingView Charting Library, Sentry, New Relic, GitHub, Jira, AWS

Practices

Accessibility (WCAG / ARIA), Web Performance Optimization

Education

IMS Engineering College, Ghaziabad

2018 – 2022

Bachelor of Technology – Computer Science

Ghaziabad, India

Achievements

- Received the **Velocity Masters Award** at SMC Global for consistently delivering high-impact features within aggressive timelines.
